

CY-DM系列智能功率因数校正装置

CY-DM Series Intelligent Power Factor Correction Device

· 型号说明 Model

CY - DM - □ □ - □ % - 0.48

· 功能及特性 Function & Features

- 特点：集滤波电容、滤波电抗器、投切开关、保护单元、控制单元为一体模块化设计；
Feature: A modular design integrates with the filter capacitor, filter reactor, hurl-slices switch, protection unit and control.
- 结构：组合合理，缩扩容方便自如，安装简易，便于维护；
Structure: reasonable combination, easy to enlarge and reduce the capacity, to install and maintain.
- 通讯：485通讯接口，支持智能网络及后台配电综合管理；
Communication: 485 communication interface, support the intelligent network and comprehensive management of background power distribution;
- 寿命：连续频繁投切，100万次无故障投切
Service Life: A trouble-free and continuous frequent switching for 1 million times

- 界面：液晶显示，操作简便
Interface: liquid crystal display and easy to operate
- 安全：内置SH防爆及温控装置，有效抑制谐波涌流，提高强谐波下运行安全性
Safety: Build-in SH anti-explosion and temperature control devices, which can effectively restrain the harmonic wave and inrush current, and improve the operation safety under the strong harmonic wave.
- 响应：采用分散控制模式，响应速度 $\geq 18\text{ms}$
Response: adopt the decentralized control mode, speed of response $\geq 18\text{ms}$

· 规格型号表 Forms of Specifications

· 型号表（一） Form of Specifications (I)

补偿方式 Compensation Mode	容量 Capacity	规格型号 Specifications	备注 Remark
三相共补 Δ Three-phase compensation	40kvar	CY-DM-40-7%-0.48	特别注意：在同一型号表内选择补偿容量规格 Note: To chose the compensation mode, capacity and specifications within the same form.
	20kvar	CY-DM-20-7%-0.48	
	10kvar	CY-DM-10-7%-0.48	
分相补偿Y Phase-splitting compensation	20kvar	CY-DM-20-7%-0.28	
	10kvar	CY-DM-10-7%-0.28	

· 型号表（二） Form of Specifications (II)

补偿方式 Compensation Mode	容量 Capacity	规格型号 Specifications	备注 Remark
三相共补 Δ Three-phase compensation	30kvar	CY-DM-30-7%-0.48	特别注意：在同一型号表内选择补偿容量规格 Note: To chose the compensation mode, capacity and specifications within the same form.
	15kvar	CY-DM-15-7%-0.48	
	7.5kvar	CY-DM-7.5-7%-0.48	
分相补偿Y Phase-splitting compensation	15kvar	CY-DM-15-7%-0.28	
	7.5kvar	CY-DM-7.5-7%-0.28
